THE AI LAYER FOR CAFÉS

Taste, matched. Freshness, measured. Nothing wasted.

Built on top of the QR menu, loyalty and CRM that four cafés already run on — now with taste matching, storage intelligence and safety-gated surplus offers.

03 — PRODUCT SYSTEM

Taste Match

Swipe ingredients, get dishes ranked across cafés by live availability.

Thermal Debt

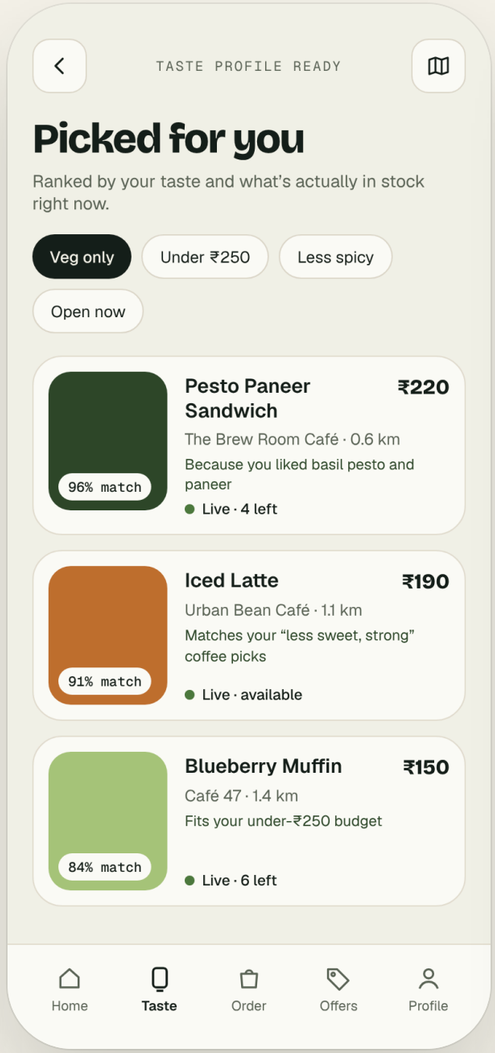

Tracks cumulative time-temperature exposure, not one snapshot reading.

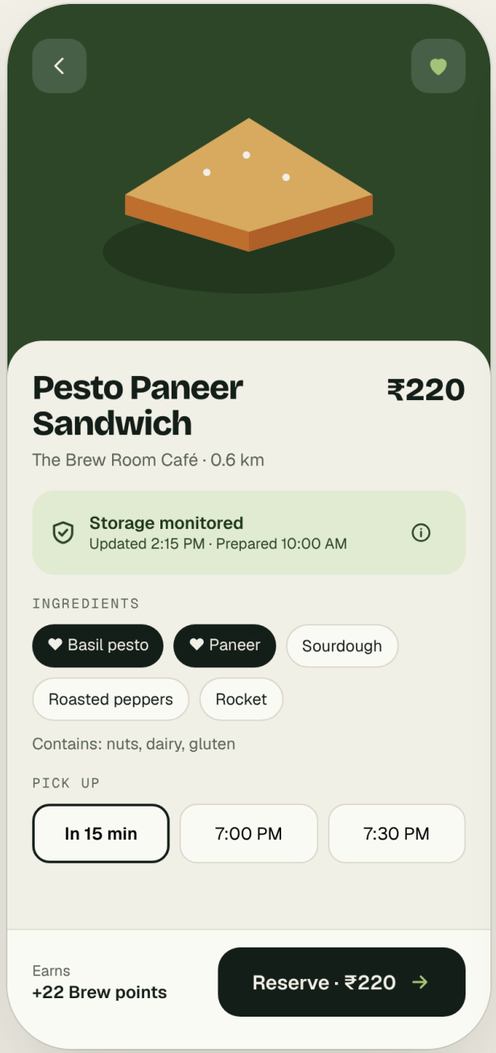

Second Serve

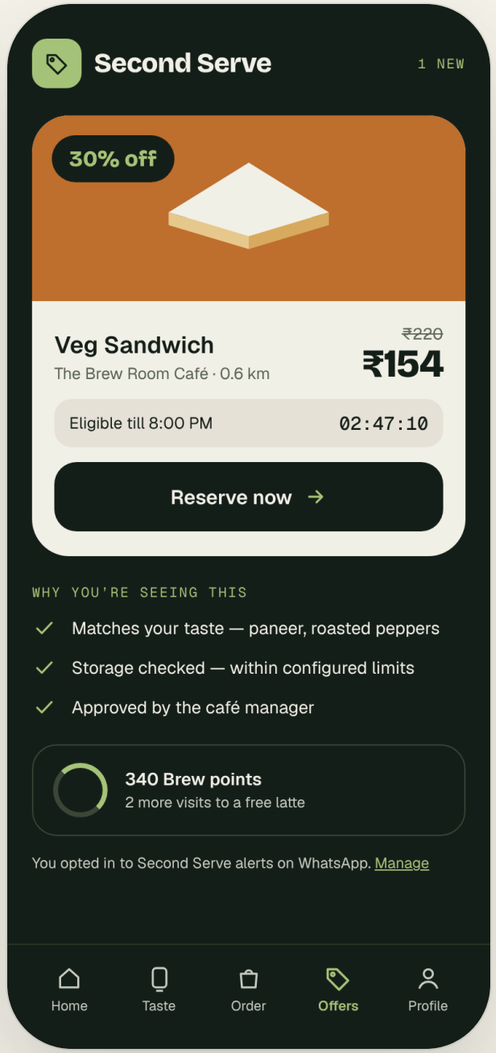

Manager-approved, safety-gated offers sent only to matched, opted-in customers.

Swipe → Match → Discover → Recover

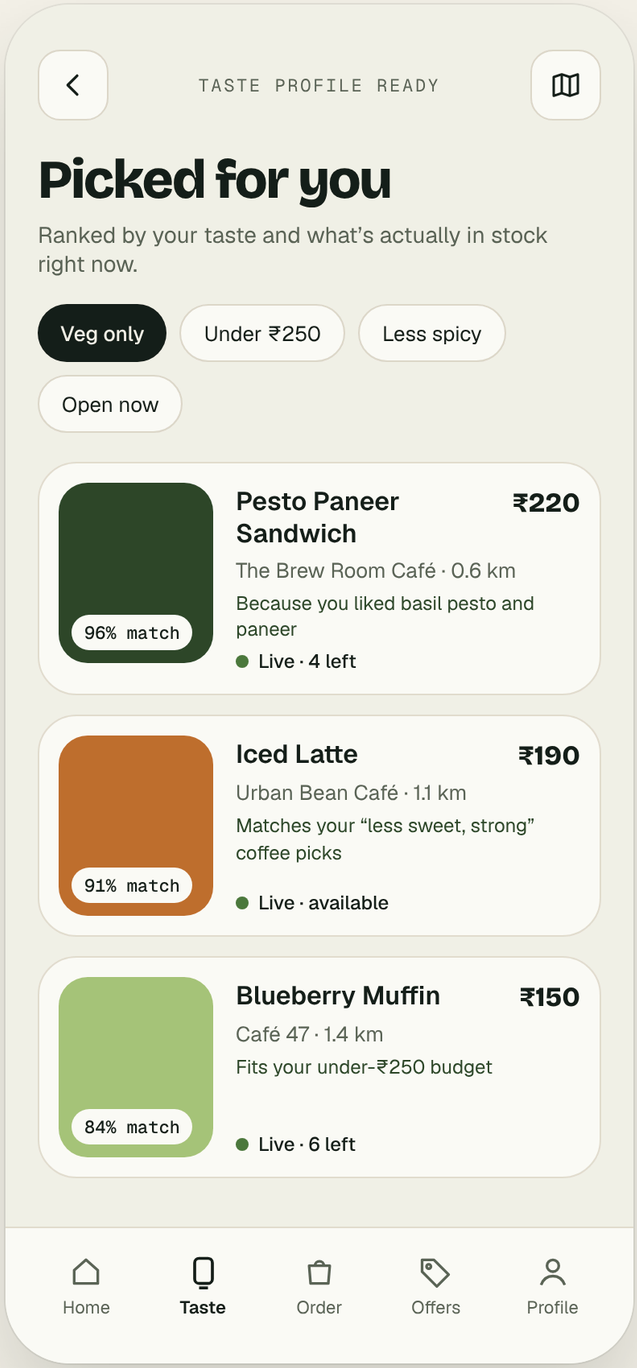

01 · TASTE MATCH

Swipe to build a taste profile

Customers swipe on ingredients — not dishes — so the app learns what they actually like in under a minute.

- Like / skip / not-sure on each ingredient card
- Progress bar shows how close the taste profile is
- Diet tags and allergens shown on every card
- Feeds the ranking model with consented preferences

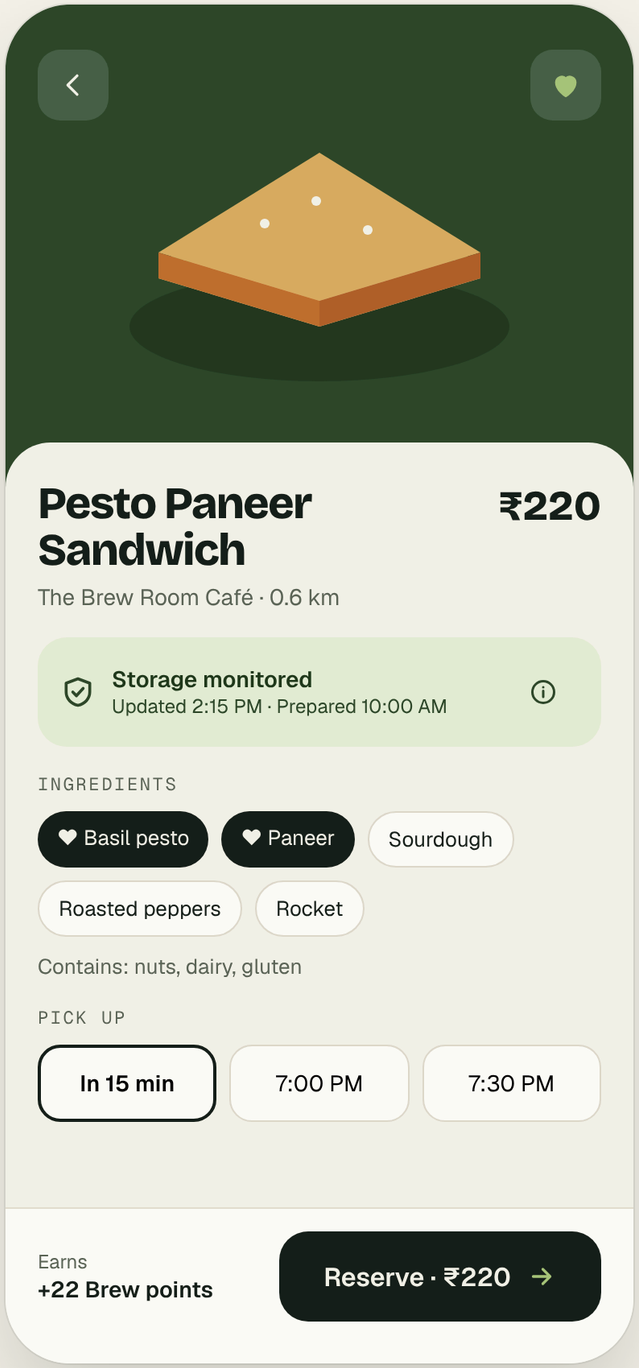

02 · PICKED FOR YOU

Dishes ranked across cafés

Matched dishes from participating cafés, ranked by taste fit and filtered by what is actually in stock right now.

- Match score plus a plain-language “why” line
- Live availability from the café menu
- Filters for diet, budget, spice and open now
- Distance and café name on every result

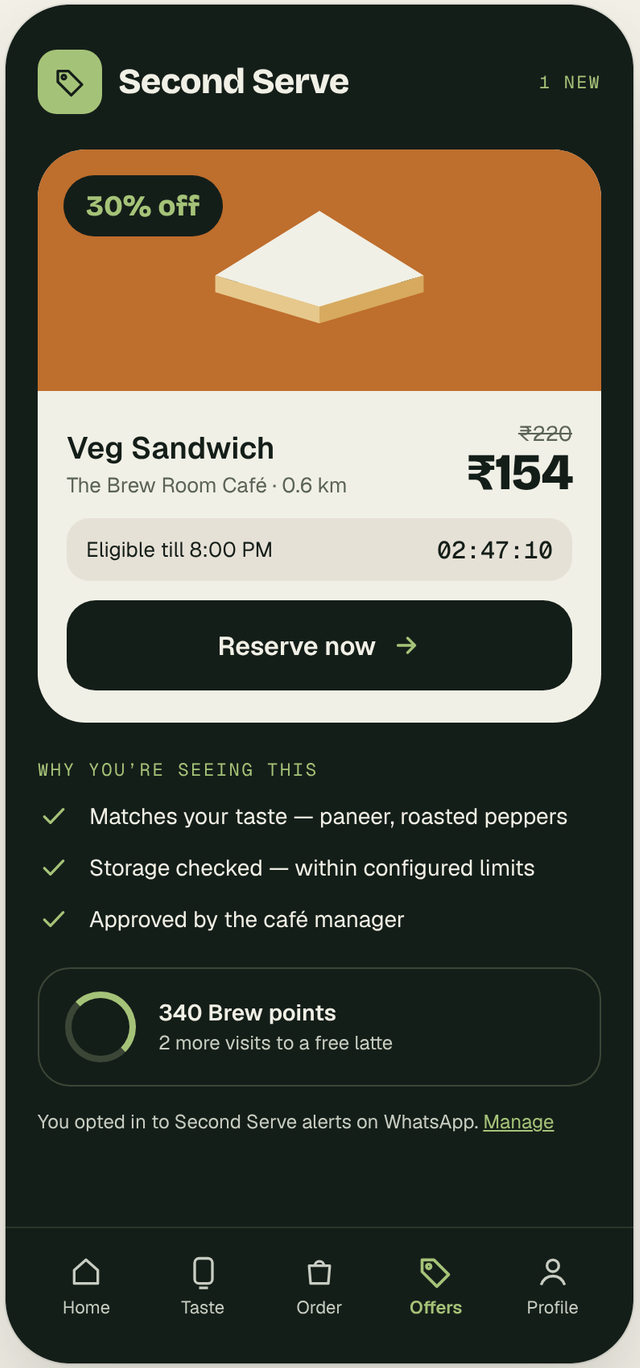

03 · DISH DETAIL

Clear ingredients, monitored storage

Everything a customer needs to decide: ingredients they liked highlighted, allergens, and a simple storage badge.

- “Storage monitored” badge — never internal risk states
- Liked ingredients highlighted in dark chips
- Pick-up slot selection and loyalty points
- One-tap Reserve to order ahead

04 · SECOND SERVE

Safety-gated surplus offers

Likely-unsold food becomes a targeted offer — only after the safety gate and the manager approve it.

- Sent only to matched, opted-in customers
- Countdown to the end of the eligible sale window
- Transparent “why you’re seeing this” checks
- Ties into existing Brew points loyalty

CAFÉ MANAGER CONSOLE

Thermal Debt, approvals and forecasts in one place

CAFÉ OS

- Today
- Batches & sensors
- Second Serve offers
- Demand forecast
- Menu & QR
- Customers & loyalty
- Audit log

Decision-support only. Sensor readings indicate monitored conditions; they do not prove food is safe. Staff confirm every action.

THE BREW ROOM CAFÉ · SAT 17 OCT

Good evening — 1 offer needs you.

DEMO DATA | Export report

Recovered revenue today	Predicted surplus	Batches monitored	Sensor uptime
₹1,848	9 units	12	99.2%
12 Second Serve orders	Across 3 batches by close	1 warning · 1 blocked	1 probe offline since 4:40 PM

Batches · Thermal Debt

Cumulative time–temperature exposure vs configured window

BATCH	NOW	THERMAL DEBT	WINDOW LEFT	STATUS
Paneer filling #P023 · prep 10:00	4.2°C		~3h 00m	Within limits
Veg Sandwich #S118 · prep 11:00	5.1°C		~1h 50m	Within limits
Cooked rice tray #R041 · prep 12:30	9.8°C		Review	Warning
Chicken tikka filling #C044 · prep 09:15	11.4°C		Ended	Blocked
Cold brew concentrate #B207 · prep 08:00	– –		No data	Unknown

Sensor outages are flagged as Unknown — never green. Blocked batches are excluded from all offers.
